/ SKILLS

- TECH SKILLS**
- Typescript/JavaScript/React/React Native/Next.js/Angular.
 - HTML5/CSS3, graphql, Redux, Tailwind Css.
 - Node/express, MySQL.
 - Git/GitHub, react testing library, Jest.
- SOFT SKILLS**
- Communication, Problem-solving, Teamwork, Adaptability, Time management, Attention to detail, Creativity, Empathy.

/ EXPERIENCE

SR fullstack/mobile Developer: * global hitss

January 2023- November 2024.

- Actively participated in the full software development lifecycle using React, Next.js, Angular, and TypeScript, from planning to deployment and maintenance.
- Implemented unit and functional tests using Jest and React Testing Library, ensuring code quality and minimizing production issues.
- Collaborated with cross-functional teams to integrate clean or hexagonal architecture principles and design patterns such as SOLID, enhancing project scalability.
- Developed reusable components with Styled-Components and Angular's component-based architecture, ensuring consistent styling and reducing code redundancy.
- Optimized applications to improve performance, reducing load times by up to 20% through techniques such as caching, lazy loading, and asset optimization.

Fullstack Developer: * coelios smarter technologies

January 2021-january 2023.

- Migrated class components to functional components in React and leveraged Angular's reactive programming approach with RxJS for better state management.
- Developed responsive and visually appealing user interfaces using Material-UI, Tailwind CSS, Ant Design, and Angular Material.
- Proposed and designed UI/UX components from scratch, presenting prototypes in Figma to improve user experience.
- Designed GraphQL mutations and queries to fetch only the necessary data, enhancing performance and user experience.
- Conducted manual, integration, and unit testing using Jest, React Testing Library, Jasmine/Karma, and Cypress to ensure component reliability before deployment.

/ PERSONAL PROJECTS

>> youtube Clone

I created a clone of the youtube interface using: React, Material UI, javascript, axios, css and consuming the api v3 following best practices.

deployed:

<https://gokuqa-youtube-clone.netlify.app/>

<https://github.com/gokuqa/youtube-clone>

/ EDUCATION

>> UVEG universidad virtual del estado de guanajuato

systems engineer
